The best climbing walls for your child

Bouldering wall Valo

ASSEMBLY INSTRUCTIONS

Bouldering wall Valo
ASSEMBLY INSTRUCTIONS

WARNING:

Not suitable for children under 3 years of age. Use only under adult supervision.
Small parts may pose a choking hazard.
The assembly is best carried out by two adults.

IMPORTANT INSTALLATION INSTRUCTIONS
PLEASE READ THESE INSTRUCTIONS CAREFULLY AND FOLLOW EVERY STEP EXACTLY.

The Valo bouldering wall is intended solely for climbing and age-appropriate physical activities in private indoor settings.

Wall mounting

The Valo bouldering wall must be placed on a level and stable floor and must also be securely fixed to a suitable, load-bearing wall. Installation where the bouldering wall hangs freely above the floor is not permitted.

The fixing materials supplied are intended exclusively for concrete and brick walls. For other types of wall, you must use suitable fixing materials. Before installation, check whether your wall is suitable for fixing. If you are unsure about the wall type, the fixing materials or the installation process, you should consult a qualified professional.

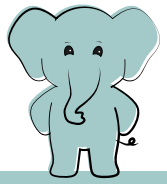

Installation must only be carried out by adults. Securely fix all panels to the wall in accordance with the installation instructions and use fixing materials suitable for the specific wall type.

Use of climbing holds

The position of the climbing holds can be adjusted to create different climbing routes. Only adults are permitted to fit, reposition or replace the climbing holds. Before using the equipment again, all climbing holds must be securely fastened and checked to ensure they are firmly in place.

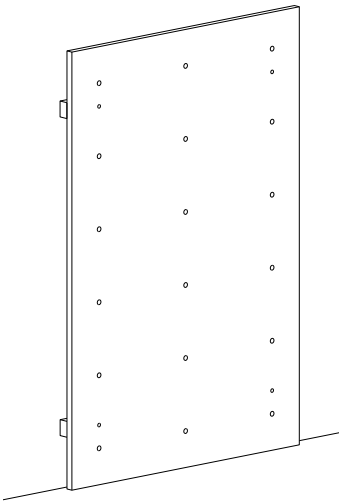

Care instructions

Clean the multiplex panels and climbing holds with a soft, dry or slightly damp cloth, then dry them thoroughly. Do not use harsh or abrasive cleaning products, and avoid prolonged exposure to moisture.

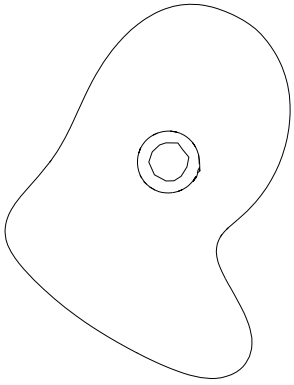

Contents of the package

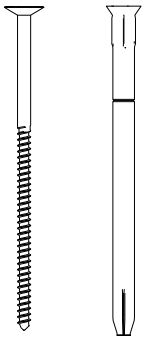

Your parcel contains the following:

2 x Panels with pre-fitted mounting beams

10 x Climbing hold

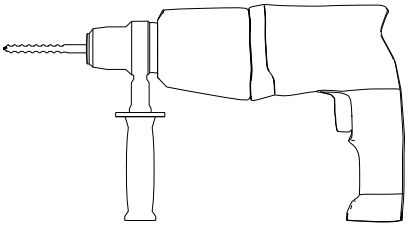

8 x Screws & Plugs **D**

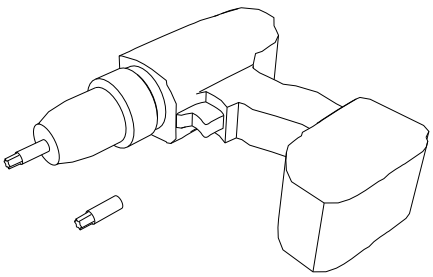

10 x Screw **K**

You will also need:

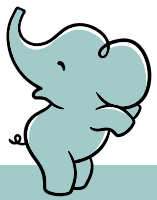

A drill with various drill bits for drilling the holes for wall mounting.

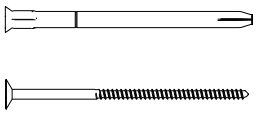

Optional:

Cordless screwdriver with Torx bit

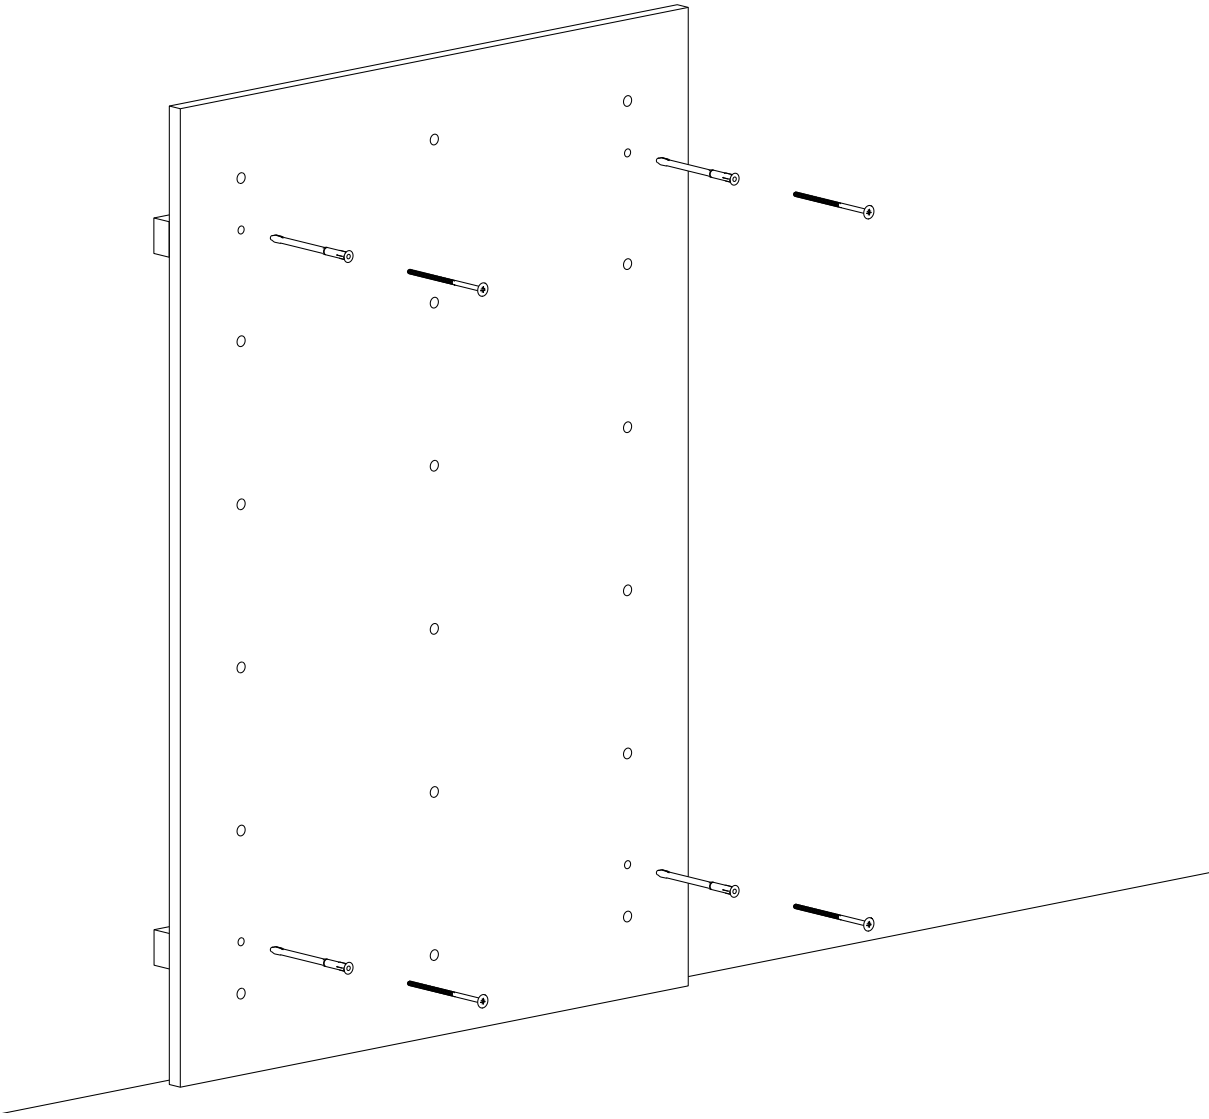

Step 1

8 x Screws & Plugs **D**

The bouldering wall consists of two panels with pre-fitted mounting beams. Position it where you want it, ensuring that it rests fully on the floor and is not hanging freely against the wall.
Using an 8 mm drill bit, drill through the existing holes into the wall. The drilling depth should be approx. 85–90 mm. Clean the drill holes, insert the wall plugs through the mounting beams and secure the bouldering wall with the screws provided. The wall plugs supplied are suitable exclusively for concrete and brick walls. For other types of wall, e.g. sandstone or plasterboard, suitable wall plugs must be used.

Important: Safety and stability cannot be guaranteed if the installation is carried out incorrectly or in a manner other than specified. In this case, we accept no liability and will not provide a free replacement.

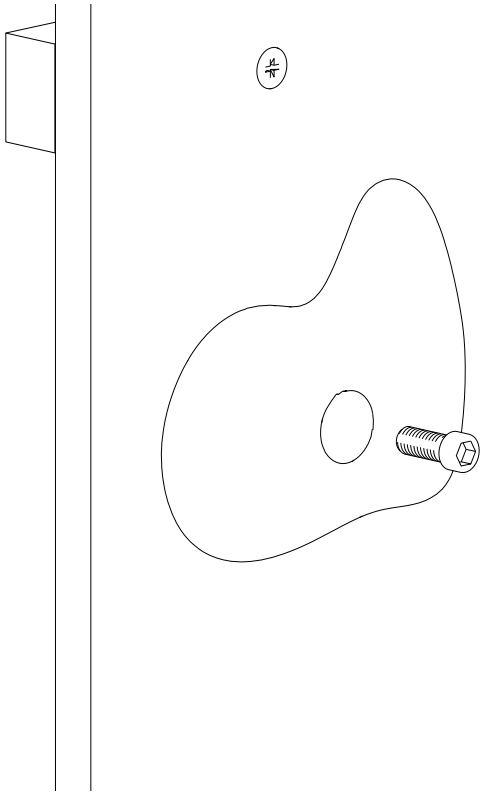

Step 2

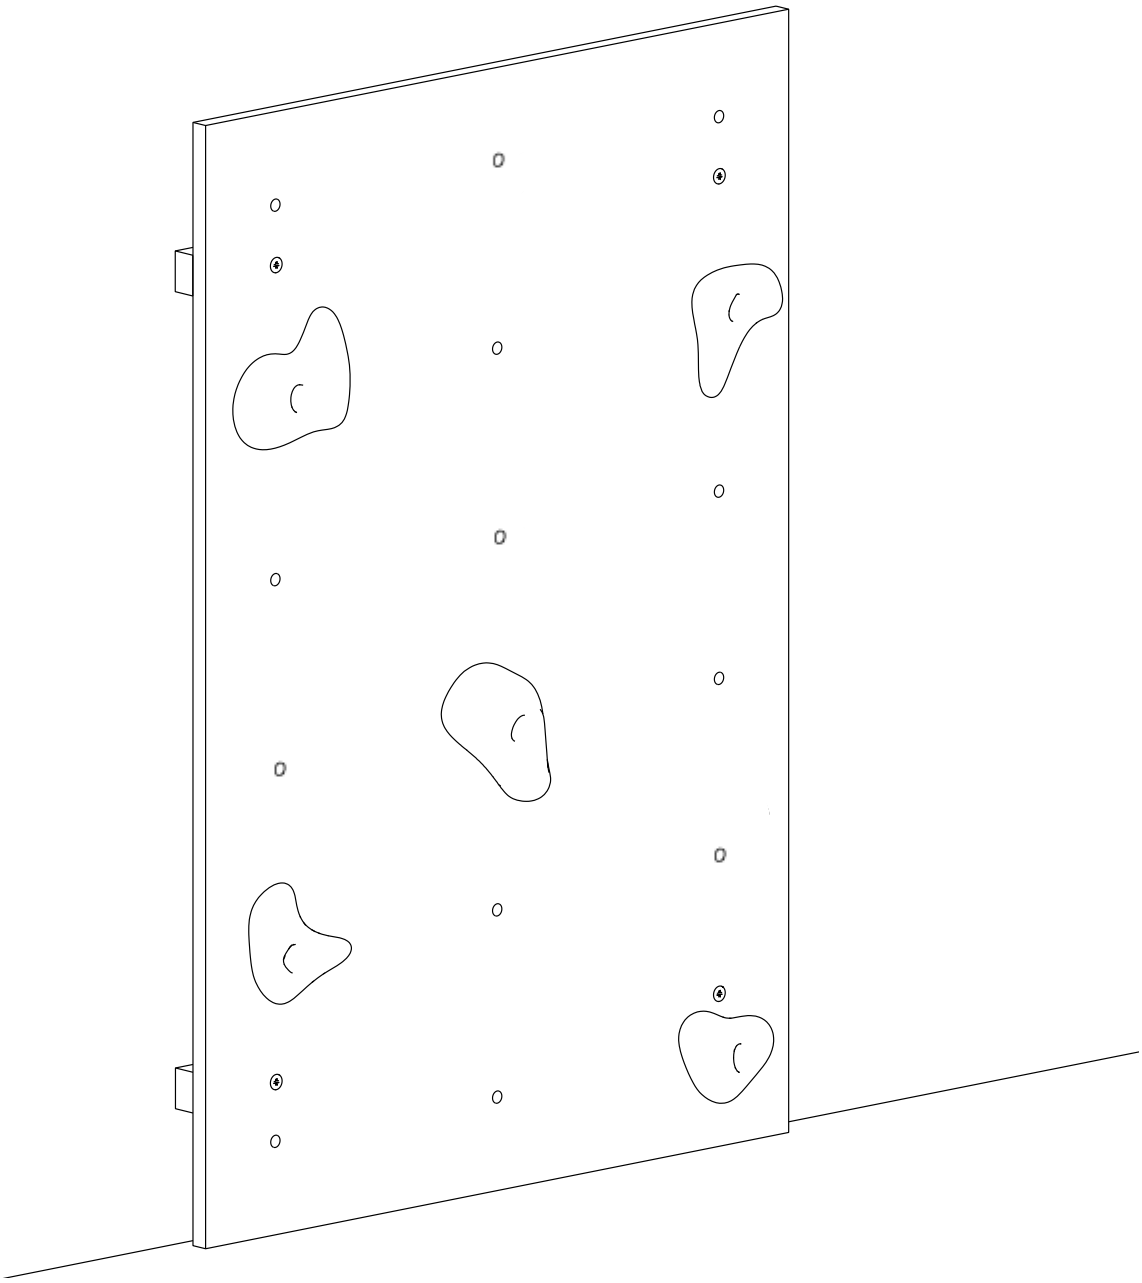

10 x Screw **K**

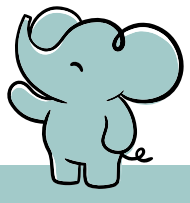

Place the climbing holds on the bouldering wall as you wish. Choose different positions and spacings to design your own climbing route. Then secure all the climbing holds firmly to the panels using the K screws. Finally, check all the fixings.

Step 3

Congratulations – your Valo bouldering wall is ready to use. Design your climbing routes exactly as you like and keep changing them – that way, your climbing experience will remain varied and exciting.
We hope you have lots of fun with your Valo bouldering wall!

SLONI

The best climbing walls for your child

Quality meets design

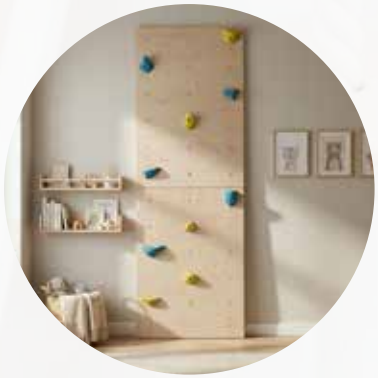

Of course, we want only the best for your child. Climbing promotes children's physical and mental development in a playful way. Our products are lovingly handcrafted from solid pine and beech wood, are untreated and, naturally, free from harmful substances. And, just like you, we love good design. That's why we founded SLONI. Find out more at sloni.de.
